Profile

Full-Stack Software Engineer delivering production-ready web applications from concept to deployment. Core stack: React, Node.js, Core PHP, MongoDB, and MySQL. Design scalable system architectures, build secure backend services, optimize databases, solve complex technical challenges, and write clean, maintainable, production-quality code.

Technical Stack

Languages & Core: JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL

Frontend: React.js, Tailwind CSS, Bootstrap, Material-UI, Responsive Design

Backend: Node.js, Express.js, RESTful API Design, Core PHP, Middleware Implementation

Database & ORM: MySQL, MongoDB, Mongoose ODM, Prisma, Schema Design, Query Optimization

Security: JWT, Firebase Authentication, OAuth, Secure Session Management

DevOps & Tools: Docker, Git, GitHub, Postman, npm, Webpack, Babel

Experience

SyntecX Solutions – Software Engineer

November 2025 – Present, Islamabad

Develop and maintain core modules, Team, Members, Organization Roles, and Organization Management for Where-Works, a production multi-tenant workforce management platform, using Node.js-based backend APIs and MySQL. Debug session-handling and application logic issues, resolve schema and database issues, and systematically test endpoints across roles and management modules in a MVC architecture. Collaborate in Agile sprints and participate in code reviews and sprint planning.

Upwork – Full-Stack Web Developer

December 2024 – September 2025,

Remote Delivered multiple client projects including a full-stack including SmartHub and a School Management System, collaborating within a 4-member distributed team.

Projects

WhereWorks – Smart Management System

Demo

SyntecX Solutions

Built and maintained core modules (Team, Members, Organization Roles, and Organization Management) for a production multi-tenant workforce management platform. Worked across Node,Express based backend APIs and MySQL schema design, debugging session and logic issues and systematically testing endpoints across modules in a Node MVC architecture.

Tera Marketing, Company Website

Demo

Local Client

Marketing and advertisement company website built with React.js and Node.js/Express, with a MySQL and Prisma-backed content layer for managing services, campaigns, and client inquiries. Focused on responsive design and lead capture forms to support the client's marketing outreach.

MediStock, Pharmacy Inventory & POS System

Local Client

Full-stack pharmacy inventory and point-of-sale system built with React.js, Node.js, and MySQL. Implemented batch-level expiry tracking, FIFO-based stock deduction, and automated weekly/monthly profit reporting to support day-to-day pharmacy operations.

QuizCraft, Full Stack Quiz Platform

Final Year Project, University of Peshawar

Intelligent quiz generation system for educators, built as a full-stack MERN application. Integrated Firebase Authentication with role-based access for educators and students, developed a RESTful Node.js/Express backend for quiz creation, management, and automated grading, and engineered MongoDB schemas with Mongoose ODM. Added automated PDF export of quiz results via jsPDF.

Education

Bachelor of Science in Computer Science

University of Peshawar, September 2021 – August 2025

Languages

English (Fluent), Urdu (Native)
